PLANNING — WITH 3-DIMENSION COLOR SLIDES

Our sales representative will gladly call at your request to look over your property. He will offer helpful suggestions, present you with progressive ideas, show you with the aid of 3rd dimension color pictures, the suitable varieties of Evergreens, Trees, Shrubs, Vines, Roses, etc. that would be in harmony with your home.

If you are interested in doing your own planting, we can help you with a simple plan to make your planting easy.

PLANTING

is easy when you know how, but it is the **KNOW-HOW** that makes a Landscape Planting successful.

Years of experience qualify us to cope with any landscape planting problems, big or small, that your yard or estate may present. Years of careful study of soil and climatic conditions make our services more valuable.

LANDSCAPE CONSTRUCTION

with us, embraces many features so important to the usefulness and beauty of the home grounds, industrial and professional buildings, churches, schools, etc.

Good construction is most essential if lasting results are to be obtained. This applies to the preparation of lawns, flower beds, rose gardens or any area where planting is to take place.

Also, good base construction is very important where flagstone patios, hot-top roads and walks, pasture-stone walls or out-of-door living areas are to be built.

SUCCESSFUL SUMMER PLANTING

Of EVERGREENS, TREES and SHRUBS with the
New plastic spray, WILT-PRUF

By digging the plants with a ball of earth and plastic-coating, it is possible to safely transplant trees and shrubs in full leaf, with complete success, thus extending the planting season into June, July and August.

Sure! You can plant in the summer when it's hot and dry! Transplanting success in the summer is evidenced by the landscaping around the North Shore Dental Hospital, pictured above. The evergreens, trees and shrubs were safely transplanted during June and continued normal, healthy growth.

See the dwarf narrow hedge in the wall pockets of the steps to the entrance? That is our new patented broadleaf *Euonymus* EMERALD CHARM!

Corliss Bros. Inc. have done many summer plantings around new houses, and revamped old plantings. Some in 90 degree heat very successfully. If you have a newly completed house and the grounds are still bare, you don't have to eat dust all summer — planting is possible and safe. Trees and shrubs properly planted, filter dust, temper the climate. Good lawns make summer living cooler, absorb glare.

You, too, can add color, charm and value to your property. Let us help you give it a radiant new individuality.

School

BEAUTIFICATION

means

COMMUNITY BETTERMENT

The beautiful planting around the East Gloucester Elementary School was executed by the Parent-Teacher Association members, with suggestions from Corliss Bros. Inc., who supplied the material.

This is a splendid example of a community's way of contributing to the American way of living . . . An asset to any city . . . Good for the morale of the children . . . Good for public relations . . . A deep satisfaction to the Association.

A project of this kind, be it for school, park, church, or municipal building encourages and builds civic pride, and beautifies the city. It leads to cleaner streets, healthier conditions, increased property value, encouragement of new industries, a better place in which to live; and there is a profound sense of satisfaction of community achievement, a realization of how pleasantly communities can be improved with organized planting activities.

There are many ways to PLANT AMERICA and make a city beautiful. A number of cities permit cash donations to provide one or more trees for beautification and climatic control. Many of the mature trees in the East were planted on home properties by newly-married couples moving into new homes — the trees being a living symbol of their love.

Another custom is to plant a tree on the home property for each child, in order that each may have a tree of their very own, to watch grow — or if a fruit tree, to add delicious food. This has educational value, too — they protect their own and others. Great sentiment and value are attached to such trees by the entire family.

Ground Cover Plants

Used extensively as underplanting in the foundation plantings between larger plants. They keep the roots of plants cool in summer, and at the same time enhance the beauty of the planting.

These plants may also be used to good advantage on terraces, rocky knolls, steep banks, rock gardens, and under trees where grass won't grow.

For your convenience, these *items are grown in bands in special units of 25 plants, easy for you to take with you and to plant.

Deciduous Shrubs

FOR FLOWERS, FOLIAGE, BERRIES

Any true lover of nature will find a world of joy and happiness watching the striking and fascinating changes in flowering shrubs throughout the season. They are a delight from the first mild spring day, when the buds begin to swell, until late in autumn, when the leaves are resplendent in their festive colors and brilliant berries.

We are only able here to acquaint the reader with a very small portion of this wealth of beauty. Generous planting of shrubs around the home will repay in beauty and pleasure many times over the small investment required.

Container-Grown Plants

A New Modern Method of Growing Nursery Stock

Plants grown in containers, designed for safe, efficient removal, give you many additional benefits over bareroot, and balled and burlapped stock—some of which are:

Elimination of root-shock and subsequent wilting by giving you ALL of the root system.

A planting season limited only by frozen ground.

Extra convenience in handling and carrying the plants you buy.

This is consistent with our policy of giving you — the customer — the most value for your money.

This modern method of growing and selling **CONTAINER-GROWN NURSERY STOCK** assures healthier plants, better growth, and a complete root system. There is little or no loss in transplanting "canned" plants. As easy to buy as a loaf of bread — neat and simple to plant. Or, they can be safely kept in their containers if immediate planting isn't possible.

Saves you time in buying — in planting — and gives you protection on your purchases.

All container-grown plants purchased will be loosened in their containers for you before leaving the nursery for easy transplanting upon arrival home.

An excellent assortment of container-grown plants, ready to carry home or for delivery will be available in our Garden Center at Ipswich.

You can have large, luscious berries like these, delicious for pies, eating, canning, freezing — right in your own back yard.

Every one of our bushes offered for sale bore heavily last year.

Cultural Directions for Blueberries *Easy to Plant*

Plant 3 or more varieties for perfect pollination. Set 5x5 ft. apart. Mix in liberal quantities of Corliss #2 mixture especially prepared for Blueberries (2 lbs. per 1 ft. of height) when planting.

Keep well watered at all times unless you have them planted in a spot where natural moisture abounds.

Selected Roses

Suited to this Climate

WE RECOMMEND POTTED ROSES

Already Planted and in Good Growing Condition

Ready for Transplanting about June 1st

As our Potted Roses are not ready to be set into your garden until late May or the first of June, we advise that you **place your order early** so we may reserve for you the varieties you wish.

(AARS—All America Rose Selection)

\$2.00 each, unless otherwise priced. Any 6 or more Roses purchased at one time, 15¢ off price each Rose.

This modern way of selling roses eliminates all danger of their not starting or dying after being planted in your garden, due to improper handling and planting. When you purchase POTTED ROSES, they are already planted properly in specially prepared, fertilized soil to insure rapid, permanent growth and bloom.

Our POTTED ROSES may be transplanted successfully in your garden any time during the growing season by simply setting the plant, **pot and all**, into a properly fertilized bed or location without disturbing the soil or root system.

NEW

AJUGA RAINBOW

Patent No. 1492

Now—An Ajuga With A Personality

A fine new hardy plant that is wonderful for shade or sun. The early spring leaves, arranged like rosettes, are dark bronzy-green. In July, they start to change to metallic purplish-red and become mottled with rainbow colors of cream, pale yellow, pale green, very pale pink to dark pink, brick red, and even bronze. These colors will change with the season and amount of sun the plants receive.

The plant is low, dense and compact.

Its usefulness as a specimen plant, for edging a border, walk or driveway, and as a ground cover makes its very attractive.

AJUGA RAINBOW makes a beautiful carpet under trees where grass won't grow.

Adding to its attractiveness are clear blue florets on spikes about 6 inches high that appear in May or June.

The plant is easy to grow, resistant to pests and diseases.

Pot plants, \$1.00 each; 3 for \$2.75; \$10.00 per dozen.

Hardy Perennials

Note:—Figures after the description and blooming dates represent the approximate height reached by the perennials under favorable conditions.

***SUITABLE AS ROCK GARDEN PLANTS, ALSO**

MASSACHUSETTS NURSERYMEN ADOPT TRADE-MARK

Now the consumer public can identify quality products and services with those firms who display this sign. They subscribe to the high standards of the Massachusetts Nurserymen's Association and American Association of Nurserymen.

Advertising of plant sizes differ. For example, a two to three ft. plant or shrub can be nothing more than a "Whit" (1 or 2 stems) as termed by nurserymen compared to a heavier grade of 3 to 5 stems offered by the members of the Massachusetts Nurserymen's Association.

Planting Directions

BALLED and BURLAPPED MATERIAL:

Dig holes 18" larger than diameter of ball and 6" deeper than the depth of the ball. Save top-soil, discard sub-soil. Mix, at least 3 times, prescribed amounts of assembled fertilizer with saved top-soil or new loam for proper blending. Spade enough of soil-fertilizer mixture into bottom of hole to insure ball being set at original plant depth as indicated by different bark color. Fill in hole around ball half full. Tamp well. Cut strings and burlap flush with filled-in soil. Fill hole with water and allow to soak in. Complete filling hole with mixture, leaving top saucer-shaped to catch moisture. Water weekly.

BARE ROOT MATERIAL:

The diameter of the hole should be dug at least 2 feet larger than root spread, and 12" deeper than depth of roots. Save top-soil, discard sub-soil. Spade enough of soil-fertilizer mixture into bottom of hole to insure plant being set at original depth as indicated by different bark color. Trim broken root ends. Set plant in hole and fill hole half full of mixture, shaking plant up and down several times to work soil around roots. Tamp well. Fill hole with water. After water has soaked in, complete filling in, leaving surface saucer-shaped to catch water. Stake all trees over 2" caliper, using wires run through rubber hose to avoid chafing. Water weekly.

LOCAL FREE DELIVERY ZONE

Beverly Farms, Essex, Gloucester, Hamilton, Ipswich, Manchester, Prides Crossing, Rockport, and Wenham.

.....

Weekly, and sometimes more frequent during the spring and fall planting seasons, deliveries are made to **Beverly, Danvers, Lynnfield, Marblehead, Newburyport, Peabody, Salem, Swampscott, and Topsfield** and the **DELIVERY CHARGE**, based on size of order, is very reasonable; minimum charge is **75¢**.

We can arrange delivery beyond this territory, based on size of order and distance, at cost, which in most cases is not greater than the combined cost of packing, freight or express. This is a very satisfactory method, as plants are delivered fresh to you.

Please — We must have you order a few days before the scheduled delivery. This not only gives us more time to select better stock, but it does insure delivery on schedule.
